DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nishikawa et al. '877 in view of Fridman '004.

Nishikawa et al. discloses a method for making a load cell by attaching a sensor, which is also a strain gage to a mount. Nishikawa et al. does not disclose a method of securing the sensor by using pressure and heat. Fridman discloses a method of securing an electronic components by applying a pressure force to the device against the mount with a pressure member; heating the component and mount through the pressure member to form a secure bond between the sensor and the mount; the pressure member is at least a clamp that clamps the sensor and the mount together; and removing the clamp after heating the strain gage and a metal member for a predetermined amount of time.

Allowable Subject Matter

Claims 3, 4, 5, 6 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 10, 11, 12 and 13 allowed.
